6 Months Training TR-104 Full Stack Development

April, 2026

Day 5 – Notes CRUD Implementation and Poster Design

1. Objective of the Day

The objective of the day was to implement basic CRUD operations for notes in the CollabNest project and continue designing posters for live projects.

2. Tasks Performed

- Implemented functionality to create new notes in the application
- Stored note data in Firestore database
- Retrieved and displayed notes dynamically in the UI
- Implemented delete functionality for removing notes
- Ensured proper data flow between frontend and Firestore
- Tested note creation, display, and deletion features
- Designed posters for live projects using Canva
- Improved visual hierarchy and alignment in poster designs
- Applied consistent styling across multiple poster templates

3. Tools / Technologies Used

- Angular Framework
- Firebase Firestore
- AngularFire
- Canva

4. Key Learnings

- CRUD operations are fundamental for dynamic applications
- Firestore enables real-time data storage and retrieval
- Data binding connects backend data with UI effectively
- Proper structure improves usability of notes system
- Canva helps maintain design consistency across projects

5. Challenges Faced

- Managing real-time data updates between Firestore and UI
- Ensuring correct deletion of notes without affecting other data

6. Solutions

- Tested CRUD operations with multiple data scenarios
- Verified database updates after each operation

7. Conclusion

- Successfully implemented basic notes CRUD functionality
- Continued improving poster designs with consistent styling
