

6 Months Training TR-104 Full Stack Development

June, 2026

Day 4 – Training Completion Review and Project Handover

1. Objective of the Day

The objective of the day was to review the work completed during the six-month training period, finalize project-related activities, and participate in the project handover process under the guidance of senior developers.

2. Tasks Performed

- Reviewed the projects completed during the training period, including Angular and Firebase-based applications and live website development work
- Discussed project implementation approaches and outcomes with senior developers
- Verified completion of assigned tasks and project deliverables
- Participated in final project review sessions conducted by mentors and team members
- Assisted in organizing project files, documentation, and development records
- Reviewed key technical concepts and practical skills learned throughout the training
- Completed pending administrative and project-related formalities

3. Tools / Technologies Used

- Angular Framework
- Firebase
- Visual Studio Code
- Web Browser

4. Key Learnings

- Project reviews help evaluate technical growth and practical experience
- Team collaboration plays a significant role in successful project delivery
- Proper documentation and organization support long-term project maintenance
- Continuous learning contributes to professional development
- Real-world projects provide valuable industry exposure

5. Challenges Faced

- Reviewing and summarizing work completed across multiple projects
- Ensuring all project deliverables and records were properly organized

6. Solutions

- Conducted systematic review of completed work and project contributions
- Coordinated with mentors and senior developers to verify project completion

7. Conclusion

- Successfully completed the final review and handover activities of the training program
- Consolidated knowledge gained throughout the six-month training period and prepared for formal completion of the internship program
