Day 8 – UI Improvement and Poster Design

1. Objective of the Day

The objective of the day was to improve the user interface of the application and continue designing posters for live projects.

2. Tasks Performed

- Designed dashboard layout for better user experience
- Implemented sidebar navigation for easy access to features
- Improved alignment and spacing of UI components
- Enhanced responsiveness of the application for different screen sizes
- Applied Angular Material components for consistent UI design
- Tested UI across different sections of the application
- Designed posters for live projects using Canva
- Refined visual hierarchy and layout in poster designs
- Ensured consistency in design elements across multiple posters

3. Tools / Technologies Used

- Angular Framework
- Angular Material
- Canva

4. Key Learnings

- UI design plays a crucial role in user experience
- Responsive design ensures usability across devices
- Consistent layout improves application readability
- Angular Material helps maintain uniform design
- Canva allows creation of visually appealing and structured designs

5. Challenges Faced

- Maintaining consistency across different UI components
- Designing responsive layouts for various screen sizes

6. Solutions

- Used Angular Material components for uniform design
- Tested layouts on different screen sizes and adjusted accordingly

7. Conclusion

- Successfully improved application UI and responsiveness
- Continued enhancing poster designs with better visual structure
