

6 Months Training TR-104 Full Stack Development

May, 2026

Day 1 – Application Testing and Poster Design

1. Objective of the Day

The objective of the day was to begin comprehensive testing of the CollabNest application and continue designing posters for live projects.

2. Tasks Performed

- Reviewed all implemented modules of the application
- Tested authentication features including signup, login, and logout
- Verified route protection and user access control
- Tested notes creation, editing, and deletion functionalities
- Recorded issues observed during testing
- Designed posters for live projects using Canva
- Improved poster layouts and visual presentation
- Exported finalized poster designs

3. Tools / Technologies Used

- Angular Framework
- Firebase
- AngularFire
- Canva

4. Key Learnings

- Testing helps identify hidden issues in applications

- Functional validation improves software quality
- Systematic testing ensures feature reliability
- Documentation of issues simplifies debugging
- Canva supports efficient design creation

5. Challenges Faced

- Testing multiple interconnected modules
- Tracking issues across different features

6. Solutions

- Followed a structured testing approach
- Documented issues for further resolution

7. Conclusion

- Successfully initiated application testing
- Continued poster design activities
