6 Months Training TR-104 Full Stack Development

April, 2026

Day 9 – Note Sharing Feature and Poster Design

1. Objective of the Day

The objective of the day was to implement note sharing functionality in the application and continue designing posters for live projects.

2. Tasks Performed

- Implemented feature to share notes with other users using email-based input
- Stored shared note data in Firestore database
- Linked shared notes with respective users
- Ensured proper access to shared notes for authorized users
- Tested note sharing functionality across different user accounts
- Verified correct storage and retrieval of shared data
- Designed posters for live projects using Canva
- Improved alignment and visual consistency across designs
- Applied consistent branding elements in posters

3. Tools / Technologies Used

- Angular Framework
- Firebase Firestore
- AngularFire
- Canva

4. Key Learnings

- Data sharing is essential for collaborative applications
- Firestore supports multi-user data access
- Proper data linking ensures correct sharing behavior
- User-based access improves collaboration features
- Canva helps maintain consistent design across multiple outputs

5. Challenges Faced

- Managing sharing logic between multiple users
- Ensuring correct access control for shared notes

6. Solutions

- Implemented structured data mapping for shared notes
- Tested sharing functionality with multiple user scenarios

7. Conclusion

- Successfully implemented note sharing feature
- Continued improving poster designs with consistent branding
