

6 Months Training TR-104 Full Stack Development

May, 2026

Day 11 – Project Requirement Analysis and Website Planning

1. Objective of the Day

The objective of the day was to understand project requirements for the Hanora website and assist senior developers in planning the website structure.

2. Tasks Performed

- Participated in discussions regarding website requirements
- Studied the project structure and page hierarchy
- Analyzed content requirements for different sections
- Reviewed design references provided for development
- Assisted in planning the Home, About, Courses, and Contact pages
- Understood client expectations and website objectives
- Coordinated with senior developers regarding implementation approach

3. Tools / Technologies Used

- Angular Framework
- Visual Studio Code
- Web Browser

4. Key Learnings

- Requirement analysis is the foundation of successful development
- Website planning improves implementation efficiency
- Understanding client needs is essential before development

- Structured page hierarchy improves user experience
- Team discussions help clarify project objectives

5. Challenges Faced

- Understanding detailed client requirements
- Mapping content to website structure

6. Solutions

- Reviewed project requirements thoroughly
- Discussed implementation approach with senior developers

7. Conclusion

- Successfully understood project requirements and website structure
- Prepared for development activities of the Hanora website
