May, 2026

Day 16 – Pop-Up Form Implementation

1. Objective of the Day

The objective of the day was to assist in implementing the pop-up inquiry form on the Home Page and ensure smooth interaction between users and the website.

2. Tasks Performed

- Assisted in implementing the Home Page pop-up form for user inquiries
- Structured form fields to collect user information efficiently
- Integrated form display and close functionality within the Home Page
- Ensured proper alignment and responsiveness of the form layout
- Verified smooth user interaction and accessibility of the form
- Assisted in validating form inputs before submission
- Tested form behavior across different devices and screen sizes

3. Tools / Technologies Used

- Angular Framework
- Angular Material
- Visual Studio Code

4. Key Learnings

- Pop-up forms improve lead generation and user engagement
- Form usability plays an important role in user experience
- Responsive design ensures consistent behavior across devices

- Input validation improves data accuracy and reliability
- Interactive UI components require thorough testing

5. Challenges Faced

- Maintaining responsive behavior of the pop-up form
- Ensuring smooth opening and closing interactions

6. Solutions

- Tested form functionality under different screen resolutions
- Refined UI behavior to provide a seamless user experience

7. Conclusion

- Successfully contributed to the implementation of the Home Page pop-up form
- Improved understanding of interactive form development and user engagement features
