

6 Months Training TR-104 Full Stack Development

May, 2026

Day 17 – Website Integration and UI Refinement

1. Objective of the Day

The objective of the day was to integrate the developed website pages and perform initial user interface refinements to ensure a consistent user experience.

2. Tasks Performed

- Integrated Home, About, Courses, Contact, and Pop-Up Form components into the website structure
- Verified navigation flow between all website pages
- Ensured consistency in design and layout across different sections
- Improved alignment, spacing, and responsiveness of UI elements
- Reviewed content placement and visual hierarchy for better readability
- Assisted senior developers in refining website appearance based on project requirements
- Tested overall website functionality and page rendering

3. Tools / Technologies Used

- Angular Framework
- Angular Material
- Visual Studio Code

4. Key Learnings

- Proper integration is essential for maintaining a seamless user experience
- Consistent UI design improves website usability and professionalism

- Responsive layouts ensure accessibility across multiple devices
- Website structure should support smooth navigation between pages
- UI refinement helps improve overall presentation quality

5. Challenges Faced

- Maintaining design consistency across multiple pages
- Ensuring smooth navigation without layout issues

6. Solutions

- Performed page-by-page review of UI components
- Applied consistent styling and layout standards throughout the website

7. Conclusion

- Successfully integrated major website sections into a unified structure
- Improved overall user interface and website consistency through refinement efforts
