

6 Months Training TR-104 Full Stack Development

May, 2026

Day 2 – Bug Identification and Resolution with Poster Design

1. Objective of the Day

The objective of the day was to identify bugs in the application and resolve issues discovered during testing.

2. Tasks Performed

- Analyzed issues reported during testing
- Fixed authentication-related errors
- Corrected navigation and routing issues
- Verified proper functioning after applying fixes
- Re-tested corrected modules
- Designed posters for live projects using Canva
- Refined design elements and layouts
- Maintained consistency across poster designs

3. Tools / Technologies Used

- Angular Framework
- Firebase
- AngularFire
- Canva

4. Key Learnings

- Debugging improves application stability

- Re-testing is important after bug fixes
- Small issues can impact user experience significantly
- Careful validation ensures reliability
- Consistent design improves branding

5. Challenges Faced

- Identifying root causes of issues
- Ensuring fixes do not affect existing features

6. Solutions

- Tested each fix individually
- Verified functionality after modifications

7. Conclusion

- Successfully resolved identified issues
- Continued poster development work
