May, 2026

Day 20 – Preparation for Client-Requested Website Enhancements

1. Objective of the Day

The objective of the day was to prepare the Hanora website for the implementation of newly received client requirements and review the existing structure before major modifications.

2. Tasks Performed

- Reviewed the existing website structure and completed development work
- Analyzed sections that required updates based on client feedback
- Assisted in planning modifications related to branding and content presentation
- Reviewed page layouts to accommodate additional website sections
- Examined navigation flow and content hierarchy for upcoming changes
- Coordinated with senior developers regarding implementation priorities
- Prepared the project structure for future enhancement activities

3. Tools / Technologies Used

- Angular Framework
- Angular Material
- Visual Studio Code
- Web Browser

4. Key Learnings

- Client feedback plays a crucial role in website refinement
- Proper planning simplifies large-scale modifications

- Reviewing existing implementation helps prevent future issues
- Content organization affects website usability and engagement
- Collaborative discussions improve implementation efficiency

5. Challenges Faced

- Evaluating the impact of multiple enhancements on the existing website structure
- Planning modifications while maintaining consistency across pages

6. Solutions

- Conducted detailed review of the current website implementation
- Organized enhancement requirements according to development priorities

7. Conclusion

- Successfully prepared the website for the next phase of client-requested enhancements
- Established a clear roadmap for implementing branding updates, new sections, and UI improvements in the upcoming development cycle
