Day 5 – User Interface Review and UX Improvements

1. Objective of the Day

The objective of the day was to review the application interface and improve overall user experience.

2. Tasks Performed

- Reviewed dashboard layout and navigation flow
- Tested responsiveness across different screen sizes
- Verified dark mode and light mode functionality
- Improved spacing, alignment, and visual consistency
- Refined navigation and user interaction elements
- Addressed minor UI inconsistencies identified during review
- Verified usability across major application modules

3. Tools / Technologies Used

- Angular Framework
- Angular Material

4. Key Learnings

- User experience significantly impacts application usability
- Consistent UI design improves navigation efficiency
- Responsive design enhances accessibility
- Visual refinement improves overall professionalism

- Regular UI reviews help identify hidden issues

5. Challenges Faced

- Maintaining consistency across multiple screens
- Ensuring responsiveness on different devices

6. Solutions

- Conducted detailed UI reviews and applied improvements
- Tested layouts under different display conditions

7. Conclusion

- Successfully improved overall user experience and interface quality
- Enhanced consistency and responsiveness throughout the application
