Day 13 – Data Cleaning and Formatting

1. Objective of the Day

The objective of the day was to clean and format the extracted data to make it consistent and usable for further processing.

2. Tasks Performed

- Reviewed extracted data for inconsistencies and errors
- Removed duplicate entries manually from Excel sheets
- Corrected formatting issues such as spacing, capitalization, and alignment
- Standardized data fields for uniform structure
- Handled missing or incomplete data entries
- Organized data into proper columns and categories
- Verified cleaned data for accuracy and consistency

3. Tools / Technologies Used

- Microsoft Excel
- PDF Documents

4. Key Learnings

- Data cleaning is essential for accurate results
- Consistency in formatting improves data usability
- Duplicate and incorrect data can affect system performance
- Manual verification is important for maintaining data quality

- Clean data is crucial for further processing

5. Challenges Faced

- Identifying inconsistencies in large datasets
- Handling incomplete or missing data

6. Solutions

- Carefully reviewed data line-by-line for accuracy
- Standardized entries manually to maintain consistency

7. Conclusion

- Successfully cleaned and formatted extracted data
- Prepared structured and reliable data for further use
