Day 15 – Data Management and Updating Records

1. Objective of the Day

The objective of the day was to manage and update data records to ensure accuracy and maintain consistency across all project files.

2. Tasks Performed

- Reviewed existing Excel records for required updates
- Updated incorrect or outdated data entries
- Added new data extracted from recent files
- Ensured consistency between multiple Excel sheets
- Maintained proper data alignment and structure
- Verified updated records for accuracy
- Coordinated with senior engineers to confirm correct data updates

3. Tools / Technologies Used

- Microsoft Excel
- PDF Documents

4. Key Learnings

- Data management is a continuous process in real-world projects
- Regular updates are necessary to maintain data accuracy
- Consistency across datasets is crucial
- Proper record maintenance supports system reliability

- Attention to detail is important in handling data

5. Challenges Faced

- Managing updates across multiple files without errors
- Ensuring no data inconsistency after modifications

6. Solutions

- Cross-checked updated data with original sources
- Maintained a step-by-step approach for updating records

7. Conclusion

- Successfully managed and updated project data records
- Ensured accuracy and consistency across datasets
