

6 Months Training TR-104 Full Stack Development

May, 2026

Day 8 – Deployment Preparation and Project Review

1. Objective of the Day

The objective of the day was to prepare the application for deployment and perform a final project review.

2. Tasks Performed

- Reviewed project structure and configurations
- Verified production-ready application settings
- Removed temporary development configurations
- Organized project files and assets
- Reviewed application features for deployment readiness
- Checked Firebase configuration and integration
- Conducted final pre-deployment validation

3. Tools / Technologies Used

- Angular Framework
- Firebase
- AngularFire

4. Key Learnings

- Proper preparation reduces deployment issues
- Configuration management is important for production environments
- Organized project structure improves maintainability

- Final review ensures readiness for release
- Deployment preparation requires attention to detail

5. Challenges Faced

- Verifying all configurations before deployment
- Ensuring production readiness of all modules

6. Solutions

- Conducted systematic project review
- Validated application settings and integrations

7. Conclusion

- Successfully prepared the application for deployment
- Completed final project readiness review
