6 Months Training TR-104 Full Stack Development

March, 2026

Day 16 – Data Tracking and Monitoring

1. Objective of the Day

The objective of the day was to track and monitor data across multiple files to ensure consistency, completeness, and proper organization.

2. Tasks Performed

- Reviewed multiple Excel sheets to track data entries
- Cross-checked data between different files for consistency
- Identified missing or mismatched records
- Maintained tracking of updated and pending data
- Verified alignment between extracted, cleaned, and stored data
- Ensured all required entries were present in the datasets
- Reported discrepancies to senior engineers

3. Tools / Technologies Used

- Microsoft Excel
- PDF Documents

4. Key Learnings

- Data tracking ensures accuracy across large datasets
- Monitoring helps identify inconsistencies early
- Cross-verification is important in real-time projects
- Proper tracking improves data reliability

- Organized data simplifies monitoring

5. Challenges Faced

- Tracking large amounts of data across multiple files
- Identifying mismatches between related datasets

6. Solutions

- Followed a systematic comparison approach
- Verified data step-by-step across files

7. Conclusion

- Successfully tracked and monitored project data
- Ensured consistency and completeness of datasets
