# 6 Months Training TR-104 Full Stack Development

## March, 2026

## Day 17 – Data Verification and Quality Check

### 1. Objective of the Day

The objective of the day was to verify the accuracy of the managed data and perform quality checks before final usage in the project.

### 2. Tasks Performed

- Reviewed all processed Excel data for accuracy
- Cross-checked data with original PDF sources
- Verified correctness of user and project-related entries
- Identified and corrected remaining errors or inconsistencies
- Ensured no duplicate or missing entries were present
- Validated data formatting and structure
- Confirmed data readiness for further use in the system

### 3. Tools / Technologies Used

- Microsoft Excel
- PDF Documents

### 4. Key Learnings

- Data verification is essential before final usage
- Quality checks ensure reliability of the system
- Cross-referencing improves accuracy
- Clean and verified data reduces future errors

- Attention to detail is critical in data handling

**5. Challenges Faced**

- Identifying minor errors in large datasets
- Ensuring complete accuracy across all files

**6. Solutions**

- Performed detailed line-by-line verification
- Rechecked data against original sources

**7. Conclusion**

- Successfully verified and validated project data
- Ensured high-quality and reliable datasets
