6 Months Training TR-104 Full Stack Development

March, 2026

Day 19 – Data Consolidation and Final Dataset Preparation

1. Objective of the Day

The objective of the day was to consolidate all processed data into final datasets and ensure readiness for further use in the project.

2. Tasks Performed

- Combined data from multiple Excel files into a unified format
- Ensured consistency across all consolidated datasets
- Verified that all required fields were present and correctly aligned
- Removed any remaining duplicate or inconsistent entries
- Organized final datasets for easy access and usage
- Prepared data in a format suitable for further system integration
- Coordinated with senior engineers for final validation

3. Tools / Technologies Used

- Microsoft Excel
- PDF Documents

4. Key Learnings

- Data consolidation is important for final data usability
- Unified datasets improve efficiency in further processing
- Consistency across files ensures reliability
- Final preparation stage is critical before system usage

- Organized data supports smooth integration

5. Challenges Faced

- Managing large datasets during consolidation
- Ensuring no data loss or duplication during merging

6. Solutions

- Carefully merged datasets step-by-step
- Cross-verified consolidated data with original files

7. Conclusion

- Successfully consolidated and prepared final datasets
- Ensured data readiness for further use in the project
