Day 20 – Final Data Review and Project Support Completion

1. Objective of the Day

The objective of the day was to perform final review of all processed data and ensure complete readiness of datasets while concluding support for the ongoing project tasks.

2. Tasks Performed

- Performed final review of all consolidated Excel datasets
- Cross-checked data accuracy with original PDF files
- Verified completeness of all required data fields
- Ensured consistency across all files and records
- Confirmed that data was properly structured for further use
- Assisted senior engineers in final validation of datasets
- Addressed any last-minute corrections or updates
- Ensured all assigned data tasks were completed successfully

3. Tools / Technologies Used

- Microsoft Excel
- PDF Documents
- Web Browser

4. Key Learnings

- Final review is essential before data is used in applications
- Accurate and structured data ensures system reliability

- Attention to detail is critical in final stages
- Data preparation directly impacts system performance
- Team collaboration is important for successful project completion

5. Challenges Faced

- Ensuring complete accuracy across large datasets
- Identifying and correcting minor errors in final stage

6. Solutions

- Conducted thorough verification of all data entries
- Coordinated with team members to confirm final data accuracy

7. Conclusion

- Successfully completed data management tasks for the project
- Ensured high-quality and reliable datasets ready for further use
